Kubernetes Community Days

- KCD is a series of events organized in different parts of the world by the Cloud Native affiliated communities.
- This is the first KCD event to be held in South-Eastern Europe.
- All engineers, architects and enthusiasts are welcome.

Romania 2024

- 250 attendees
- 1 Full Day
- 2 Tracks (main + side)
What's it all about?

- KCD Romania will bring together the local cloud community for a technical conference loaded with talks and opportunities to learn and network.
- We’ll focus on creating lasting value from the community and for the community, increase diversity and inclusion by adopting a strict code of conduct to eliminate any discrimination and provide a harassment-free environment.
- Talks that are technically competent, relevant to the larger community and coming from end-user will have higher priority compared to vendors, to ensure the best possible quality of sessions and an interesting event for the majority of attendees.
- The value of being part of a community is undeniable and a major part in the strategic marketing of many small and big players in the cloud native space – and it is the right thing to do.

Sponsors have the chance to:

- Position their product and business as a serious player in the cloud native space;
- Connect with the local community and other major companies active in the industry;
- Contribute and share their journey with the Romania Kubernetes and Cloud Native community (expected 250+ attendees).
